Education

VIT-AP University *2023 – 2027*
B.Tech in Computer Science and Engineering (AI & ML) **CGPA: 9.07/10.00**

Sri Chaitanya JR kalasala *2021 – 2023*
Intermediate Education (PCM) **96.3%**

St.Anthony's Grammar High School *2020 – 2021*
Secondary Education (SSC) **GPA: 10.0/10.0**

Technical Skills

Languages: Python, Java, JavaScript, TypeScript, SQL
AI/ML: PyTorch, TensorFlow, Scikit-learn, NLP, Computer Vision, Generative AI, Transformers, FAISS
Web Development: React.js, Node.js, Express.js, REST APIs, Socket.IO, JWT, OAuth
Databases & Cloud: PostgreSQL, MongoDB, Firebase, Prisma ORM, AWS
Tools: Git, Postman, Jupyter Notebook

Projects

NexTask – AI-Powered Collaborative Kanban Platform

- Built a real-time Kanban platform using React, TypeScript, Node.js, Express, PostgreSQL, Prisma, and Socket.IO with synchronized board updates.
- Developed task-complexity estimation using technical keyword signals and Jaccard similarity, with GitHub issue import and a Chrome task-creation extension.

SkillSync – Real-Time Skill Exchange Platform

- Built a MERN-based skill exchange platform with Socket.IO matchmaking, real-time chat, collaborative notes, and JWT authentication.
- Implemented credit-based sessions, skill-debt tracking, peer ratings, reputation scoring, GitHub skill import, and community analytics.

Semantic Search Engine – Cluster-Aware Document Retrieval

- Built semantic document retrieval using Sentence Transformers embeddings and FAISS on the 20 Newsgroups corpus.
- Added PCA dimensionality reduction, GMM clustering, TF-IDF keyword analysis, and cluster-aware caching for efficient retrieval.

Retinal Disease Detection System – Medical AI

- Developed a custom dual-branch CNN–Transformer model combining lightweight ConvNeXt-V2 and Swin-inspired attention for 5-class diabetic retinopathy grading.
- Trained on APTOS 2019 using stratified splitting and augmentation, achieving 72.9% validation accuracy.

Experience

Web Development Intern – Unified Mentor *Jun 2025 – Sep 2025*

- Developed and deployed web applications across document management, healthcare, real-time communication, and interactive web domains.
- Implemented authentication, RBAC, REST APIs, WebSocket features, cloud integrations, and responsive frontend experiences using Node.js, Express.js, Firebase, MongoDB, and JavaScript.

Achievements

Design Patent – Smart Power Bank Innovation *2025*

- Co-contributor to a multi-function smart power bank design registered under the Indian Designs Act (Design No. 455127-001), contributing to system design, safety architecture, and functionality planning.

Vice President – Machine Learning Club (MLC), VIT-AP *2023–2026*

- Led ML workshops, hackathons; contributed to the club receiving the **Best Technical Club Award (2025–2026)**.

Top 10 Project – Engineering Clinics Expo, VIT-AP *2025*

- GreenVoice ranked among the Top 10 projects for IoT-based plant health prediction using sensor data and CNN-LSTM modeling.
